Experience

WEB DEVELOPER

FREELANCER

- Provided end-to-end web development services, including both front-end and back-end development, integrating technologies like HTML, CSS, JavaScript, and frameworks such as React.js and Node.js.
- Built fully responsive, user-friendly websites from scratch for various clients in industries such as retail, real estate, and healthcare.
- Collaborated with clients to translate their vision into functional and visually appealing web designs.

Projects

Online Test Platform with Automated Evaluation / React, Nodejs, Express

- Implemented a secure login system using JSON Web Tokens for session management.
- Developed a test environment that requests and handles camera and microphone permissions before the test begins, displaying the camera feed on the interface for user monitoring.
- Designed a responsive Multiple Choice Questions test interface with intuitive navigation, where answered and unanswered questions are visually distinguished.
- Automated the evaluation process using cron jobs that run every hour, calculating scores from submitted answers and updating user records.
- Integrated email notifications using Node mailer to send test results automatically, utilizing a custom email template for consistent communication.

SUMMARY

I have a strong foundation in web development, with experience in building responsive, user-friendly websites and web applications. I am proficient in front-end and back-end technologies, including HTML, CSS, JavaScript, and server-side frameworks. My attention to detail and ability to solve problems efficiently help me deliver high-quality web solutions that meet both user and business needs

Certifications

MongoDB Node.js Developer Path

MongoDB

REACT JS

C++

Technical Skills
